Education

V.S. Patel College of Arts and Science

Sep 2022 – May 2024

Bachelor of Computer Application

Navsari, Gujarat

L.D. College of Engineering

Current

Master of Computer Applications (MCA)

Ahmedabad, Gujarat

| • Algorithms | • Web Development | • Operating Systems |
| • Database Management | • Object-Oriented | • Software Engineering |

Projects

Wanderlust – Travel Booking Platform | 🐙 Project | *Node.js, Express.js, MongoDB, EJS, Mapbox* **Aug 2024**

- Built a full-stack travel booking platform with user authentication, property listings, and booking workflows.
- Implemented secure authentication using Passport.js with session-based login.
- Integrated Mapbox for interactive maps and location-based property visualization.
- Designed RESTful APIs and MongoDB schemas for listings, reviews, and users.
- Implemented authorization checks to ensure users can only modify their own listings and reviews.

Cool Services – Home Appliance Service Store | 🐙 Project | *React.js, Node.js, Express.js, MongoDB, JWT*, **July 2025**

- Developed a full-stack web application for managing technicians, customers, and service requests.
- Implemented JWT authentication & role-based access control (Admin, Technician, Customer).
- Built real-time technician location tracking on maps using Leaflet.js with automatic location updates.
- Created Admin dashboard for managing technicians, assigning jobs, and monitoring live locations.
- Technologies used: React.js, Node.js, Express.js, MongoDB, JWT, Axios, Tailwind CSS, Leaflet.js

Tenantify – Multi-Tenant SaaS Backend Platform | 🐙 Project | *Node.js, Express.js, MongoDB, Redis, BullMQ* **Nov 2025**

- Designed and implemented a **multi-tenant backend architecture** with strict tenant isolation using middleware-based tenant resolution.
- Implemented **RBAC and JWT authentication** supporting Super Admin, Admin, and User roles.
- Developed **soft delete, restore, and permanent delete workflows** with full audit trail support.
- Integrated **email notification system** using background job queues (BullMQ) and Redis.
- Built **Activity Logs APIs** to track tenant-level CRUD operations for compliance and monitoring.

Technical Skills

Languages: JavaScript, Python, Java, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

State & Data Management: TanStack Query (React Query)(Basics), Redux (Basics)

Forms & Validation: React Hook Form

API Technologies: REST APIs, GraphQL

Backend: Node.js, Express.js, JWT, REST API Design

Databases: MongoDB, MongoDB Atlas, MySQL

Caching & Queues: Redis(Basics), BullMQ

Tools: Git, GitHub, Postman

Areas of Interest

- Backend Development and API Design
- Full-Stack MERN Applications
- System Design and Scalable Architectures
- Multi-Tenant SaaS Systems
- Data Structures and Algorithms
